SECTION A-A

1. The septic system shall be installed in accordance with the following requirements:

- The septic tank shall be installed in a location that is accessible for inspection and maintenance.
- The septic tank shall be constructed of concrete or steel and shall be watertight.
- The septic tank shall be equipped with a float valve to prevent overflow.
- The distribution box shall be installed in a location that is accessible for inspection and maintenance.
- The distribution box shall be constructed of concrete or steel and shall be watertight.
- The absorption area shall be installed in a location that is accessible for inspection and maintenance.
- The absorption area shall be constructed of concrete or steel and shall be watertight.
- The absorption area shall be equipped with a float valve to prevent overflow.

PIPE OUTLET PROTECTION DETAIL

DUST CONTROL PRACTICES:

1. The contractor shall install a dust control system on all trucks and equipment used on the project.
2. The contractor shall install a dust control system on all trucks and equipment used on the project.
3. The contractor shall install a dust control system on all trucks and equipment used on the project.
4. The contractor shall install a dust control system on all trucks and equipment used on the project.
5. The contractor shall install a dust control system on all trucks and equipment used on the project.
6. The contractor shall install a dust control system on all trucks and equipment used on the project.
7. The contractor shall install a dust control system on all trucks and equipment used on the project.
8. The contractor shall install a dust control system on all trucks and equipment used on the project.
9. The contractor shall install a dust control system on all trucks and equipment used on the project.
10. The contractor shall install a dust control system on all trucks and equipment used on the project.

STOCKPILE PRACTICES:

1. The contractor shall install a dust control system on all trucks and equipment used on the project.
2. The contractor shall install a dust control system on all trucks and equipment used on the project.
3. The contractor shall install a dust control system on all trucks and equipment used on the project.
4. The contractor shall install a dust control system on all trucks and equipment used on the project.
5. The contractor shall install a dust control system on all trucks and equipment used on the project.
6. The contractor shall install a dust control system on all trucks and equipment used on the project.
7. The contractor shall install a dust control system on all trucks and equipment used on the project.
8. The contractor shall install a dust control system on all trucks and equipment used on the project.
9. The contractor shall install a dust control system on all trucks and equipment used on the project.
10. The contractor shall install a dust control system on all trucks and equipment used on the project.

PERMANENT VEGETATION:

1. The contractor shall install a dust control system on all trucks and equipment used on the project.
2. The contractor shall install a dust control system on all trucks and equipment used on the project.
3. The contractor shall install a dust control system on all trucks and equipment used on the project.
4. The contractor shall install a dust control system on all trucks and equipment used on the project.
5. The contractor shall install a dust control system on all trucks and equipment used on the project.
6. The contractor shall install a dust control system on all trucks and equipment used on the project.
7. The contractor shall install a dust control system on all trucks and equipment used on the project.
8. The contractor shall install a dust control system on all trucks and equipment used on the project.
9. The contractor shall install a dust control system on all trucks and equipment used on the project.
10. The contractor shall install a dust control system on all trucks and equipment used on the project.

GENERAL CONSTRUCTION PHASING:

1. The contractor shall install a dust control system on all trucks and equipment used on the project.
2. The contractor shall install a dust control system on all trucks and equipment used on the project.
3. The contractor shall install a dust control system on all trucks and equipment used on the project.
4. The contractor shall install a dust control system on all trucks and equipment used on the project.
5. The contractor shall install a dust control system on all trucks and equipment used on the project.
6. The contractor shall install a dust control system on all trucks and equipment used on the project.
7. The contractor shall install a dust control system on all trucks and equipment used on the project.
8. The contractor shall install a dust control system on all trucks and equipment used on the project.
9. The contractor shall install a dust control system on all trucks and equipment used on the project.
10. The contractor shall install a dust control system on all trucks and equipment used on the project.

PROJECT SPECIFIC CONSTRUCTION PHASING:

1. The contractor shall install a dust control system on all trucks and equipment used on the project.
2. The contractor shall install a dust control system on all trucks and equipment used on the project.
3. The contractor shall install a dust control system on all trucks and equipment used on the project.
4. The contractor shall install a dust control system on all trucks and equipment used on the project.
5. The contractor shall install a dust control system on all trucks and equipment used on the project.
6. The contractor shall install a dust control system on all trucks and equipment used on the project.
7. The contractor shall install a dust control system on all trucks and equipment used on the project.
8. The contractor shall install a dust control system on all trucks and equipment used on the project.
9. The contractor shall install a dust control system on all trucks and equipment used on the project.
10. The contractor shall install a dust control system on all trucks and equipment used on the project.

CONSTRUCTION PRACTICES:

1. The contractor shall install a dust control system on all trucks and equipment used on the project.
2. The contractor shall install a dust control system on all trucks and equipment used on the project.
3. The contractor shall install a dust control system on all trucks and equipment used on the project.
4. The contractor shall install a dust control system on all trucks and equipment used on the project.
5. The contractor shall install a dust control system on all trucks and equipment used on the project.
6. The contractor shall install a dust control system on all trucks and equipment used on the project.
7. The contractor shall install a dust control system on all trucks and equipment used on the project.
8. The contractor shall install a dust control system on all trucks and equipment used on the project.
9. The contractor shall install a dust control system on all trucks and equipment used on the project.
10. The contractor shall install a dust control system on all trucks and equipment used on the project.
