CASE NO. 2016-37

DATE FILED 11-23-16

K. Ginnier
ZONING BOARD CLERK

Name of applicant Alexx Monastiero, Real Estate Advisors

Address 76 Exeter Road Newmarket, NH 03857

Owner of property concerned Same
(If the same as applicant, write "same")

Address Same
(If the same as applicant, write "same")

Location 24 Jeremiah Lane

Map No. 223 Lot No. 21 Zone A

Description of property _____

Proposed use or existing use affected Reduced frontage for allowed uses

The undersigned hereby requests a variance to the terms of Article 42.33,
Section C (3) and asked that said terms be waived to permit: _____
Reduced frontage for allowed uses

The undersigned alleges that the following circumstances exist which prevent the proper enjoyment of his land under the strict terms of the Zoning Ordinance and thus constitute grounds for a variance.

Signed Alexx Monastiero

(Applicant)

EMAIL: alexx@cheneyco.com

CRITERIA FOR VARIANCE

Case # 2016-31

Date: 11-23-16

A Variance is requested by Real Estate Advisors, Inc.

from Section 42.33 Subsection C (3)

of the Zoning Ordinance to permit: reduced frontage for allowed uses

at 24 Jeremiah Ln Map 223 Lot 21 Zone A

Facts supporting this request:

- 1) The proposed use would not diminish surrounding property values because:

The proposed duplexes would be built within a new conservation subdivision consisting of 50% single family houses and said proposed duplexes for a total of 70 units. These duplexes are intended to be a similar square footage of living space as the single-family homes, just connected by a shared wall, thereby reducing the land cost and providing a more affordable option and a more diverse neighborhood. The existing neighborhood is mixed single family and multifamily and given the values of the homes in the neighborhood new construction cannot be created at a lesser value than the existing properties and in fact will have a substantially greater market value. This is due to new construction costs, not only of the buildings themselves but also the new roads. This new conservation subdivision will also raise awareness and desire to live in the area. Values of surrounding properties will not diminish; we believe they will actually increase in value.

- 2) Granting the variance is not contrary to the public interest because:

The conservation subdivision regulations were created in the public's best interest, the requirement of 150' frontage for a duplex is contrary to the objectives of the conservation subdivision which are as follows:

"L. promote innovative site design" This cannot be achieved when using the standard 150' of frontage which is the same as the underlying district, while this is a conservation subdivision.
"M. reduce costs for the developer and maintenance costs for the City by reducing infrastructure" This cannot be achieved because requiring 150' of frontage requires more roads to be built and maintained.

"P. provide a mix of housing types" this cannot be achieved because building a duplex becomes a burden since two single family homes can be built on 120' of frontage and a duplex requires 150'.

"R. promote efficiency in road and utility layout" This cannot be achieved because it requires an additional 90' of frontage on a road to have a duplex and therefore the roads become long and cumbersome rather than efficient for the city to maintain and for the developer to build.

Furthermore, the intent of a conservation subdivision is to preserve greater tracts of conservation land and open space areas. Requiring the developer to have 150' of frontage (the same as the underlying district) reduces the amount of open space.

3.) Denial of the variance would result in unnecessary hardship to the owner because of the following special circumstances of the property:

This property falls in the agricultural zone where "the promotion of conservation subdivision is a core goal of the City of Rochester Land Use Plan." It becomes an unnecessary hardship for the city of Rochester and the Applicant to use 150' frontage for a duplex lot where a single-family lot requires only 60' frontage one can create the same density as a duplex with only 120' frontage this goes directly against the objective of the ordinance "P. provide a mix of housing types" because nobody would build a duplex when they could build two single family houses on less frontage. The code enforcement officer's interpretation of the frontage requirement also directly conflicts with "M. reduce costs for the developer and maintenance costs for the City by reducing infrastructure" as 150' frontage requires more road to be built and maintained. In the underlying agricultural district the frontage for both single-family houses and two family houses is 150' why wouldn't then, single family and duplex lots be the same in the conservation subdivision district, both 60' in order to meet the objectives of the conservation subdivision ordinance? There is an inconsistency between the purpose of the ordinance and the code enforcement officer's interpretation of that ordinance this create an unnecessary hardship for the City of Rochester and for the applicant.

4.) Granting the variance would do substantial justice because:

Our interpretation of the conservation subdivision is that a duplex, triplex, or fourplex could be built on a 60' frontage with the requirement that no more than 35% of the lot be covered provided that you meet the requirement in 42.33 (G) 1-7 (see exhibit A). Our interpretation was such because it was supported by the goals and objectives of the conservation subdivision and so, we planned our subdivision accordingly. Substantial justice would be done because it would allow the creation of our subdivision as planned which complies with the objectives of the conservation subdivision ordinance without having to re-design a plan using the 150' frontage. Substantial justice could only be done if the objectives of the conservation subdivision ordinance are met which they cannot be with 150' frontage for duplex lots.

5.) The use is not contrary to the spirit of the ordinance because:

The use is not contrary to the spirit of the ordinance because allowing 60' frontage for all allowed uses subject to the 35% lot coverage and the seven items listed in section G of the conservation subdivision ordinance (exhibit A) meets all of the objectives in general of the conservation subdivision ordinance and overwhelmingly meets the following objectives:
M. reduce costs for the developer and maintenance costs for the City by reducing infrastructure
P. provide a mix of housing types
R. promote efficiency in road and utility layout
S. locate houses on parts of the land most conducive to development

Name

Vice President, Real Estate Advisors Date: 11/22/16

11/22/2016

Members of the City of Rochester Zoning Board,

Real Estate Advisors is seeking a variance for reduced frontage for allowed uses in the conservation subdivision ordinance. We are seeking this variance because 150' frontage for duplexes does not meet the objectives of the conservation subdivision ordinance as explained in our variance attached. Allowing this variance will do substantial justice and uphold the spirit of the conservation subdivision ordinance as it was intended.

I thank you for your time in reviewing this matter.

Alexx Monastiero

Real Estate Advisors, Inc.

Regulations, Section 42.14 - Historic Overlay District, and the Architectural Jewels series in the *Rochester Times Newspaper* may be used for guidance.

8. Other Enhancement. A 5% enhancement may be awarded for any other measure which the Planning Board deems worthy, such as making a contribution to the school or other department to mitigate costs of serving the project, contributing to a stewardship fund to monitor the open space if donated to a nonprofit organization, instituting innovative methods of protecting resources, or offering special traffic mitigation approaches.
- g. **Allowed Uses.** All uses permitted in the zoning district within which the conservation subdivision is located are permitted in the conservation subdivision under the same terms. Two family, three family, four family dwellings, and townhouses are permitted in conservation subdivisions provided:
 1. at least half of the proposed units are single family dwellings;
 2. a system of street blocks or a modified grid is used;
 3. the units are carefully integrated into the development (such as placing the units on larger lots at intersections, fronting on greens, or on alternating or cross streets);
 4. the architectural designs provide for a harmonious fit with single family dwellings
 5. the development standards under Section 42.5 - Residential Zoning Districts shall apply;
 6. none of these multifamily uses are located within 200 feet of the project boundary; and
 7. each unit shall be considered equivalent to one house lot for density purposes
- h. **Zero Lot Line Subdivision.** A zero lot line subdivision is a special technique where side setbacks are reduced on the same side of all adjoining lots to accommodate usable side setbacks (*example: all of the houses along one block would have no side setback on the southerly side but an extra large setback on the northerly side, resulting in usable side setbacks for all properties on the northerly side.*) A zero lot line subdivision is permitted subject to the following:
 1. 1 Foot Setback. The minimum side setback for the building and all appurtenant elements of the building (chimney, porches, window sills, etc.) shall be at least 1 foot (rather than zero feet - to allow for error).
 2. Block. The same standards shall apply to all lots along an entire section or block to ensure adequate spacing between houses.
 3. Privacy. Special design standards shall be incorporated to foster privacy in side setbacks – such as through prohibitions on windows on the facing side elevation of the adjacent house - and are established in deeds or through other appropriate mechanisms.
