## *Zoning Board of Adjustment*

### NOTICE OF PUBLIC HEARING

Dear Abutter:

You are hereby notified of a **Public Hearing** to be held at **7:00 p.m.** on **Wednesday, April 10, 2019** in the City Hall Council Chambers concerning the following:

**2019-07** One80 Solar, LLC, applicant seeks a *Variance* from table 18-D of the City Zoning Ordinance to permit a photovoltaic power station for the generation and distribution of electricity in the Agricultural zone.

**Location:** 68 Flagg Road, Rochester, NH 03867, MLB 0262-0058-0000 in the Agricultural Zone.

**If you are planning to attend the meeting and have paperwork, you wish to have reviewed, or if you are not planning to attend the meeting, you may comment by letter, fax or email ([julia.libby@rochesternh.net](mailto:julia.libby@rochesternh.net)). However, for the Board to consider your comments you **MUST submit them NO LATER than 12:00, noon on the Monday before the meeting (April 08, 2019).****

The project application is available for review by the public in the Department of Building, Zoning, Licensing Services, or you can view the entire application on the City's website [www.rochesternh.net](http://www.rochesternh.net). Click on *Government*, then *Zoning Board of Adjustment*, then *Zoning Board Projects*. Look under the map and lot number shown above.

Please feel free to contact this department with any questions or if you have any disability, requiring special provisions for your participation.

**Office Hours are between 8:00 a.m. to 5:00 p.m. Monday through Friday.**

Applicant: One80 Solar, LLC c/o Patrick Attwater

E-mail: patrick.attwater@one80solar.com Phone: 210-802-7428

Applicant Address: 1502 S. Flores Street, San Antonio, Texas 78204

Property Owner: David & Nancy Hussey

Property Owner Address: PO Box 1601, Alton, New Hampshire 03809

Variance Address: 68 Flagg Road, Rochester, New Hampshire 03839

Map Lot and Block No: 0262-0058

Description of Property: Vacant 20.55 acre lot with no structures thereon. Served by gravel road. AG District.

Proposed use or existing use affected: Photovoltaic power station for generation and distribution of electricity.

The undersigned hereby requests a variance to the terms of Article 42, Section 18.a and asks that said terms be waived to permit the construction of a photovoltaic power station for the generation and distribution of electricity.

The undersigned alleges that the following circumstances exist which prevent the proper enjoyment of his land under the strict terms of the Zoning Ordinance and thus constitute grounds for a variance.

Signed: Patrick Attwater Date: March 20th, 2018

## Variance Criteria

1) Granting the variance would not be contrary to the public interest because:

See attached.

2) If the variance were granted, the spirit of the ordinance would be observed because:

See attached.

3) Granting the variance would do substantial justice because:

See attached.

4.) If the variance were granted, the values of the surrounding properties would not be diminished because:

See attached.

5.) Unnecessary Hardship:

a. Owing to special ***conditions of the property that distinguish it from other properties in the area***, denial of the variance would result in an unnecessary hardship because:

i. No fair and substantial relationship exists between the general public purposes of the ordinance provision and the specific application of that provision to the property because:

See attached.

And:

ii. The proposed use is a reasonable one because:

See attached.

b. Explain how, if the criteria in subparagraph (A) are not established, an unnecessary hardship will be deemed to exist if, and only if, owing to the special conditions of the property that distinguish it from other properties in the area, the property cannot be reasonably used in the strict conformance with the ordinance, and a variance is therefore necessary to enable reasonable use of it.

See attached.

**ONE80 Solar, LLC  
68 Flagg Road (Lot 0262-0058)**

**Application for Variance**

One80 Solar, LLC (“One80” or the “Applicant”), a solar energy company based out of San Antonio, Texas, proposes to develop a photovoltaic power station for the generation and distribution of electricity on land of David and Nancy Hussey located at 68 Flagg Road in Rochester, New Hampshire (identified as Tax Map Lot and Block 0262-0058; the “Property”). The Property is located in the Agricultural (AG) District. According to the Town’s records, the Property has approximately 83 feet of frontage on Flagg Road and approximately 87 feet of frontage on Huckins Lane. The Property is uniquely shaped and is partially bisected by the Isinglass River. A preliminary plan of the proposed development is included with this Application.

**Details of the Request**

The Applicant requests a variance to Article 42, Section 18.a of the Zoning Ordinance to permit the development of a photovoltaic power station for the generation and distribution of electricity where such use is not specifically permitted, nor is the use that it most closely resembles- “Utility-Power Generation.” See Article 42, Section 18.h (“In the event that a proposed use is not specifically identified in the tables, the Zoning Administrator is authorized to select the listed use which most closely resembles the proposed use in impact and intensity”).<sup>1</sup>

**Variance Standards**

*1. The authorization of a variance will not be contrary to the public interest because:*

It is in the public interest to allow the highest and best use of real estate. Currently the Property is vacant, with no improvements thereon except a gravel road for access. The proposed variance would allow a use that not only will allow the Property to be put to the highest and best use, but will have other beneficial effects for the public. The photovoltaic power station will provide a new source of clean energy for the surrounding areas. This will reduce reliance on forms of energy production that produce toxic byproducts and have other negative environmental effects. Additionally, after construction of a photovoltaic power station, maintenance and upkeep are minimal, resulting in minimal traffic or other nuisances for abutters, as opposed to other forms of energy production which require significant maintenance and man-power to operate. The project will also be beneficial for the City of Rochester in that it will provide a passive, fiscally responsible and renewable energy source.

---

<sup>1</sup> A separate variance application to permit the development to be located on two separate lots of record with less than the required minimum frontage is submitted concurrently with this Application. All information submitted in connection with the variance application for frontage is incorporated by reference hereto.

2. *The granting of a variance will not be contrary to the spirit and intent of the Ordinance because:*

The objectives of the AG District are to preserve the rural character of the outlying areas of the city and maintain the natural and scenic qualities therein by promoting open space, the preservation and expansion of agricultural activity, and facilitating tourism. Zoning Ordinance Article 42 §5.d. The Property is a vacant cleared lot. The proposed variance will not require any more clearing of trees or further excavation than has already been done. Additionally, the photovoltaic panels have a very low profile, and will have less of an impact on air space than any building. The photovoltaic panels produce no noise, and will preserve the undisturbed forests surrounding the Property. Accordingly, the proposed variance will be consistent with the overall spirit and intent of the Zoning Ordinance.

3. *Authorization of a variance will result in substantial justice because:*

The harm to the Applicant of strict enforcement of the Zoning Ordinance will far outweigh any benefit to the public in this case. Instead, denying the variance will result in a detriment to the public by limiting the beneficial expansion of a passive, fiscally responsible and renewable energy source, which reduces the dependence on conventional energy generation. Likewise, although Utility-Power Generation is not a permitted use in the AG District, photovoltaic power stations are not expressly listed and operate significantly different than conventional power generation sites. Photovoltaic power stations do not require constant oversight by employees on-site, create no toxic or negative side effects for the environment, and have a lower profile and impact on the neighborhood than conventional power generation facilities. The harm to the Applicant by not granting the variance will greatly outweigh any benefit to the public by strict adherence to the permitted uses requirements, and therefore, the variance will result in substantial justice.

4. *Authorization of a variance will not diminish the value of surrounding properties because:*

The Property has already been cleared and is prepared for the construction of a photovoltaic power station. No additional clearing will be required as a result of granting of the proposed variance. The Property is separated from many of the abutting properties by the Isinglass River. Photovoltaic panels have a low profile, will not be an eyesore, will result in minimal traffic, do not create noise or other emissions, are contained in a secure site, and will be designed to mitigate any stormwater runoff. No nuisance or unreasonable hazard will result because the site will be restricted by a fence, will be buffered by existing vegetation, and will only require maintenance activities two to four times each year.

5. *Denial of the variance would result in unnecessary hardship to the owner:*

- a. *The zoning restriction as applied to the property interferes with the reasonable use of the property because:*

The proposed photovoltaic power station is located on a 20.55 acre piece of land that is sheltered from abutters by the Isinglass River and thick vegetation. The Property is ideal for

photovoltaic panels due to the thick vegetation, Isinglass River, and reduced need for frontage and access. The photovoltaic panels will be shielded from abutters and will not be an eyesore. Solar farming is a relatively new concept and is not addressed in the Zoning Ordinance. Although its closest analogue is "Utility-Power Generation" it differs greatly from that use. Solar farming has a significantly less adverse impact than traditional energy production. The use is reasonable because solar farming will create no noise, pollution, traffic, need for buildings, or other adverse impacts.

- b. No fair and substantial relationship exists between the general purpose of the Zoning Ordinance and the specific restrictions on the property because:*

The Zoning Ordinance does not address whether solar farming is a permitted use, however it does state that "Utility-Power Generation" is not a permitted use. Under the Zoning Ordinance, if a use is not listed, the Zoning Administrator may decide if it falls under another listed use. Solar farming does not create any of the noise, eyesores, traffic, or environmental concerns associated with traditional energy generation. Solar farming is inherently different than traditional energy generation. A prohibition on solar farming would bear no fair and substantial relationship to the purposes of the Zoning Ordinance.

The Applicant reserves the right to amend, modify, and/or supplement this Application at or before the hearing thereon.

## Variance Application Checklist

- ☒ Completed application form
- ☒ Completed "Criteria for a Variance" sheet, addressing the five items set forth by the New Hampshire Supreme Court governing the granting of Variances.
- ☒ A narrative touching on the five criteria and explaining what you are requesting a variance for.
- ☒ If the applicant is not the property owner, he/she must supply a note signed by the property owner stating his/her knowledge of the application being submitted to the Zoning Board of Adjustment. The property owner will receive a copy of the public hearing notice by certified mail along with the abutters.
- ☒ A sketch including the following:

- ☐ Measurements of the distances from any existing structure to the lot lines. If the proposed structure is not attached to the building you will need the distance between buildings.
- ☐ Dimensions of the lot. (If the variance is requesting relief from a setback regulation – The Zoning Board of Adjustment requires a certified plot plan of the property, if that is not available, you can ask for a waiver)

N/A - No structures

No setback relief requested

- ☒ Photographs, if you have them.
- ☒ Abutters list. **This information must be obtained from the Zoning Clerk in the Building, Zoning, and Licensing Office. The applicant must pay the cost of the certified fee for each abutter, applicant and any other applicable person on the abutter list, including applicant.** (See Zoning Clerk for current fee)

- ☒ If there are wetlands on the parcel, refer to the City's Ordinance Chapter 42.12 © for wetland buffers of 50' and 75'.

N/A ☐ Prior to applying for a variance regarding wetlands, the applicant must receive all necessary State permits.

- ☒ Application fee (\$175.00). Check is made payable to City of Rochester, including abutters' fees.

- ☒ One PDF form of your application packet is due as well as 10 paper copies.

**All of the above information must be completed and submitted to the Building, Zoning Department on or before the deadline date, or the application will be considered incomplete and will be postponed until the next scheduled meeting, or until all the requirements have been met.**

**NOTE:** All applications will be allowed one postponement of the hearing in their application, and shall notify the Building, Zoning, and Licensing office in writing of their intent to postpone hearing at least two days prior to the meeting at which their application is to be considered. If the applicant requests a second postponement of the hearing, the application will be considered to have been withdrawn and the applicant must file a new application with the Board in order to receive a hearing. The provisions of this paragraph shall not apply to any postponement requested by an applicant as a result of the inability of the Zoning Board of Adjustment to provide the applicant with a five-member board for the hearing on the application.

**The applicant or their representative MUST attend the Zoning Board of Adjustment meeting to present their case, or no action will be taken.**

If you have any questions with any of these requirements, please contact the Zoning Clerk, Julia Libby.

Re: Request for Use Variance for Huckins Lane Solar (68 Flagg Road)

Dear Mr. Spector:

On behalf of the Applicant, One80 Solar, we at Nobis Group respectfully request that the Zoning Board of Adjustment consider our application for a Variance to permit the construction of a solar farm at 68 Flagg Road.

The proposed development site is located in the Agricultural (AG) District with portions of the property located in the Floodplain District and the Conservation Overlay District. In Table 18-D "Industrial-Storage-Transport-Utility Uses 8/7/2014" there is a use listed as "Utility - power generation" which is not an allowable use in the Agricultural District. There is no provision for solar farms in particular anywhere within the Ordinance.

The Public Utilities Commission (PUC) has a Net Metering Rule that allows a maximum size of 1 megawatt in the solar array per lot, and because the power generation is greater than 1 megawatt the Applicant must subdivide the lot into two new parcels in order to qualify. There is currently 83'  $\pm$  of frontage on Flagg Road and 87'  $\pm$  on Huckins Lane, so the Applicant is requesting a variance for the minimum required frontage of 150' for both properties so the lots will contain 83'  $\pm$  and 87'  $\pm$  of frontage, respectively. The attached Preliminary Subdivision Plan, attached herewith, depict the new lot lines for the subdivided parcel.

The proposed construction of a new photovoltaic power station will benefit the town and surrounding properties and will provide a new energy source that is low maintenance and has no noxious emissions during operation. There will not be a significant number of employees

entering the site as they will only be required on-site for maintenance and the site will not be staffed of a constant basis, unlike traditional forms of power generation. After construction there will be minimal impact to local traffic, minimal sound pollution, and no multi-story buildings to impede views for the abutters.

No new disturbance is proposed in the 25' No-Disturb buffer of the proposed wetlands or within the 75' buffer to the Isinglass River. This project does not involve the construction of any new buildings within any portion of the property. No disturbance is proposed within the portion of the site that falls within the Floodplain District either, so the Applicant is not requesting any variances for uses within the Overlay Districts at this time.

The Applicant respectfully requests that the Huckins Lane Solar project is included on the Zoning Board of Adjustment hearing agenda on April 10, 2019. We look forward to presenting the project to the Board. In the meantime, please do not hesitate to call or email for any additional information.

Sincerely,

NOBIS GROUP®
